- **Available in seven different sizes including a heavy duty frame option**
- **A range of accessories available to best meet the unique needs of every user**
- **Easy folding, lightweight and easy to carry**

BENEFITS OF THE KAYE WALKER

The Kaye Posture Control Walker is the perfect product to be used as part of a walking development programme in schools, home, or out in the community.

A product used by the NHS and equipment providers for over 20 years, the Kaye Walker offers a wide range of parts and accessories to provide users with a stable walking platform to work from.

The stainless steel and aluminium frame is sturdy and secure, yet remains extremely light weight; allowing for easy folding to go into the boot of the car; but strong enough to withstand years of constant use.

WHY THIS DESIGN?

The Kaye Posture Control Walker is designed to make walking less energy consuming and maximise the potential for walking. The design and function of the walker encourage hip and trunk extension to develop muscle tone and balance necessary for walking, whilst offering independence and more sociability to users.

TECHNICAL SPECIFICATIONS

Helps to improve the users natural bodily functions.

Promotes users independence, social interaction and engagement.

Encourages the maintenance of a vertical postural alignment.

Contributes to strengthening upper and lower body muscles.
