ALVEMA

- innovative design and functions

Ergonomics, therapists, designers and technicians have joined forces to produce a pushchair with both the child and carer in mind. The Ito from Alvema which combines simplicity and flexibility, is lightweight and has a contemporary design. The chair has been designed for easy daily use, without making any concession for sitting posture or comfort. Furthermore the Ito can be adapted to meet individual needs, thanks to a well thoughtout selection of accessories.

Ito is easily folded in three steps to a small unit that fits in the car boot.

Accessories (a selection)
