

Pixi!

ALVEMA

PIXI - with new design and improved functions

Our sales success PIXI - a light, nimble Reha buggy with a very comfortable seat - is now available in a new, modern design. PIXI is easily manoeuvrable, stable and robust - perfect for families who spend a lot of time in the city.

New improved functions as a fold-back footrest on the standard model makes it easier for children to switch seats, thereby increasing their active involvement in everyday situations! By way of an ergonomic improvement for the person in charge, PIXI is now also fitted with an adjustable-angle push-bar as standard. A new and improved, easy-to-operate foot brake with protective rubber coating is also one of the improvements on the new updated PIXI. You can choose between small or large PIXI and choose between two different seat depths with high or low back support.

easily folded to a small unit that fits in the car boot

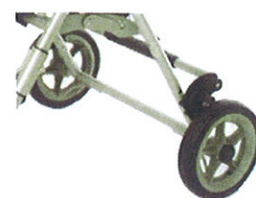

PIXI with a sunroof
