

Otto Bock®

QUALITY FOR LIFE

Robby

* patent pending

The bathing support Robby grows with the child thanks to telescoping tubes* that permit adjustment of the back height and seat depth. Robby is highly variable in other ways, too:

- Various sitting and lying positions possible using continuously adjustable ratchet joints.
- Optimal adjustability thanks to re-tensionable, hollow-shaped net cover for good lateral support and a low pelvis position.
- Adjustable headrest pads and strap systems can be used to improve positioning.

The low height of the support means that only a little bath water is needed. Robby is practical down to the finest details: the foldaway head section and removable cover make hair washing easier.

Robby: The easy-to-use bathing support especially for kids.

Robby: ergonomical, practical and light

Otto Bock®

QUALITY FOR LIFE

Robby in Detail
