Zippie TS

Paediatric Folding Tilt
and Positioning chair

Fit for Adventures

The Zippie TS is the original premier paediatric tilt-in-space chair that is available in either a folding or rigid style frame. The Zippie TS has built-in frame growth with the widest variety of options and is able to accept many seating and positioning solutions.

Tilt-in-Space up to 45°. Available in both rigid and folding frames. Also available with Foot Release Tilt Actuator, which eliminates exposed cables.

Ability to grow the chair frame as the child's needs change. The Zippie TS provides growth in both seat depth and seat width.

Optional Folding Frame is a lightweight welded frame construction which allows the frame to compress into a small package that is ideal for transport and storage in tight places.
